## ***Versatile and Reliable - COM Express by MEN***

### ***Flexible COM Express Mini Module with ARM Cortex***

The CM10 is a low-power, COM Express Mini module equipped with a TI Sitara ARM Cortex-A15 processor. With its flexible and task-specific configuration options, the CM10 is the perfect choice for all applications in industrial automation and transportation, which require high quality, reliability and flexibility at a great price-performance ratio.

### ***Robust and Space-Saving - COMs by MEN***

Based on their experience with the ultra-rugged ESMexpress and ESMINI COMs, MEN has driven the standardization of Rugged COM Express (RCE), making the industry-proven COM Express standard suitable for harsh environments. COM Express made by MEN are designed to comply with standards like EN 50155 for railways or with the automotive E-mark.

## Embedded Tech Trends, New Orleans

This year MEN will again join the VITA-driven Embedded Tech Trends to talk with other industry leaders, and meet the most relevant US media members. Using the menRDC Railway Data Center as an example, Michael Plannerer, our Head of Development, will explain how virtualization technology can be also used for transportation applications.
